Gross profit margin dropped 2.5 ppt to 32.1% while net profit margin dropped 2.3ppt to 4.6%. Net profit was affected partly due to a higher allowance for trade receivables of \$0.6 million compared to \$0.3 million in 2009.

#### Revenue breakdown

Revenue from the ornamental fish segment remains the major revenue contributor at 49%, while accessories segment contributed 38% and plastics segment accounted for 13%. Revenue from both ornamental fish and accessories declined due mainly to the drop in export to the Europe region. As explained earlier, the general weak purchasing sentiment coupled with the airport closures were the main factors. Correspondingly, revenue from the Europe region registered a 35% decrease.

#### FY2010 quarterly results review

4Q10 profitability margins were disappointing. 3Q10 had shown a rebound as the sales of self-bred dragon fish resumed in the quarter. We had expected this trend to persist into 4Q10. Ornamental fish has recorded very healthy margins in FY09 before the drought affected the supply. In 4Q10, the profit margin for ornamental fish dropped to 3%. The plastics segment maintained a healthy margin at 11% while the accessories segment margin dropped slightly.

**Geographical analysis.** Qian Hu has been carrying out its strategy of geographical expansion through merger and acquisition activities in the overseas market. In 2007, the company make invested in a 20% equity stake in Arcadia Products PLC, a manufacturer and distributor of aquarium lamp in the UK. In 2009, Qian Hu also set up a 50% joint venture company in India to undertake the manufacture of fish food and aquarium accessories. Together with the release of the financial results, Qian Hu announced the setting up of 55% owned subsidiary in Indonesia to focus in the breeding, rearing, trading, export and import of ornamental fish, as well as manufacture and export of aquarium accessories. We can see that the Asian countries region ex Singapore registering growth while all other regions shown a decline.

On the overall, we think Qian Hu has delivered on its strategy of geographical expansion and also on working towards being a debt-free and high dividend payout company. The company has managed to reduce its debt equity ratio from 0.44x in FY2009 to 0.41x in FY2010. It is also proposing a dividend of 0.5 cents per share for FY2010. This is similar to the payout in FY2009. FY2010 financial performance was affected by extraordinary factors which were beyond anyone's predictions. On a normalized basis, we believe results would have been better.

We are ceasing coverage on Qian Hu due to reallocation of resources.
